Volume Contents, Issues 1–4

VOLUME 2 NO. 1

Keynote Address Read at the Second International Conference on Statistical Methods For The Environmental Sciences Held 27–30 September 1990, Como, Italy
What Should Be the Scope of Environmetrics? 1
G. A. Barnard

Statistics and the Environment: The Analysis of Large-Scale Earth-Oriented Systems 5
H. J. Thiébaux

Penalized Regression in Action: Estimating Pollution Roses from Daily Averages 25
P. H. C. Eilers

An Outline of Ecometric Analysis to Establish Load Diagrams for Nutrients/Eutrophication 49
L. Håkanson and M. Wallin

Time Series Analysis of the Secondary Clarifier 69
P. J. Ossenbruggen, R. D. Hill and M. Gaudard

An Examination of the Lognormal and Box and Cox Family of Transformations in Fitting Environmental Data 85
M. R. Stoline

Determination of Sample Size During Ongoing Sampling 107
C. Violato

Models and Their Effect on Regulation Processes 117
R. M. Phatarfod

VOLUME 2 NO. 2

Statistics and Environmental Regulations 129
J. D. Flora, Jr.

Estimation of the LC50, A Review 139
J. A. Hoekstra

Trend Detection in the Presence of Covariates: Stagewise versus Multiple Regression 153
E. P. Smith and K. A. Rose

Trend Analysis Methodology for Water Quality Time Series 169
A. I. McLeod, K. W. Hipel and B. A. Bodo

Use of Robust Methods in the Analysis of Suspended Particulate Air Pollution: A Case Study in Malaysia 201
M. Abdullah and S. Sani

Evaluating the Impacts of a Hydro-Electric Development in Northern Manitoba, Canada 217
C. T. Shay, J. M. Shay and B. Johnston

An Approximation to the Likelihood Function with Application to Environmental Data 227
A. H. El-Shaarawi and A. Naderi

On the Propagation of Fuzziness of Data 241
S. Schnatter

VOLUME 2 NO. 3

Application of Negative Binomial Regression Models to the Analysis of Quantal Bioassays Data 253
A. Maul, A. H. El-Shaarawi and J. F. Ferard

Non-Parametric Trend Test of Baltic Sea Data 263
P. Sandén, L. Rahm and F. Wulff

Evaluating the Performance of a Water System: An Application to the Aragón and Gállego Rivers in Spain 279
H. Calvete, F. Mallor and M. San Miguel

Inverse Sampling in Case Control Studies 293
P. Singh and A. R. Aggarwal

Separation Coefficient for Analysis of Large Environmental Data Sets: Ion Concentrations of Lake Superior and Lake Huron 301
A. L. Jensen

Inverse Modelling of Environmental Pollution: The Role of Statistics 309
V. G. Dovì

B-Spline Approximation for the Baseline Hazard Function 323
J. Angelos, C. M.-S. Lee and K. P. Singh

A Search for the Source of the Nile's Change-Points 341
I. B. MacNeill, S. M. Tang and V. K. Jandhyala

VOLUME 2 NO. 4

Encountered Data, Statistical Ecology, Environmental Statistics, and Weighted Distribution Methods (with discussion) 377
G. P. Patil

Discussion 415
J. O'Connor, N. P. Ross and M. H. Degroot

Rejoinder 423
G. P. Patil

A Network Design Criterion for Estimating Selected Attributes of the Semivariogram 425
D. L. Zimmerman and K. E. Homer

Relative Performance of Two Dust Samplers: An Application of Robust Regression 443
B. C. Sutradhar, M. N. Azam and E. Moore

Shrinkage Estimation in Pooling Data for Arbitrary Populations 457
S. E. Ahmed and S. M. Khan

Relative Precision of Stratified Sampling, Sampling With Probability of Selection Proportional to Size, and Simple Random Sampling with Ratio Estimation 475
A. L. Jensen

Inference About Covariances Under Missing Values 487
S. B. Provost
